GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Dear Mr. Toponce:

### NOTICE OF ASSIGNMENT

The Division of Water Rights (Division) has received a Notice of Assignment on August 19, 2004 from you requesting ownership transfer of an unknown water right. On the form you indicate that Toponce Ranches is the current owner of a right formerly held by David and Anita Shepherd.

Since no application, permit or license number was referenced on the submitted form, the Division performed a database search using the last name of Shepherd and one record of a riparian claim (S010234) matched the name of David Shepherd on Soap Creek Road.

If you are requesting an ownership transfer of this riparian claim, please submit a completed Statement of Water Diversion and Use form. For your convenience a copy of the Statement of Water Diversion and Use form has been enclosed with this letter.

Otherwise, if you are requesting an ownership change of an appropriative water right, please resubmit a Notice of Assignment with the application number and other required information.

If you have any questions or concerns, please contact me at (916) 341-5311.

Sincerely,
